

7.8HZ

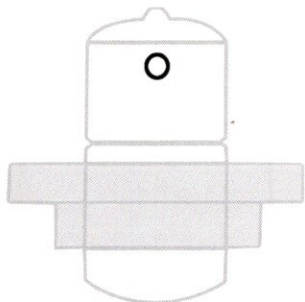

**LOW FREQUENCY MOLECULAR
RESONANCE WATER ACTIVATOR**

The cell is immortal. It is merely the fluid in which it floats that degenerates. Renew this fluid at regular intervals, give the cells what they require for nutrition, and as far as we know, the pulsation of life can go on forever.

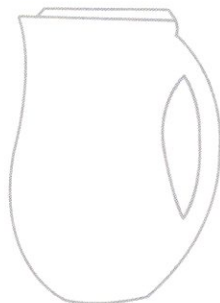

The Nobel Prize in Biomedicine: Alexis Carrel

PRODUCT COMPONENTS

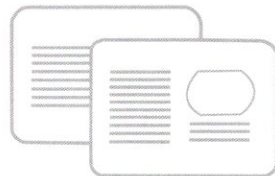

Low Frequency
Molecular Resonance
water Activator

Water Pitcher
Container

Power Adaptor

User Manual

- Water activator: a core component makes the low frequency molecular water;
- Water pitcher: made of high quality of food grade PP material, BPA free;
- Power adaptor: provides power for the water activator, input:100-240v, 50/60hz;
- User manual: product function and usage instruction.

ATTENTION:

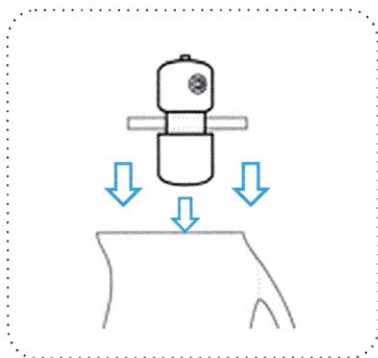

please understand if the product's design or configuration are revised due to technical update without prior notice.

USE STEPS

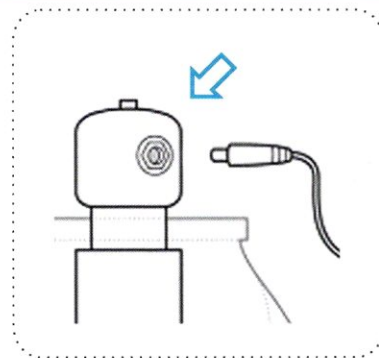

A: Add water to the container that can not exceed the maximum water level.

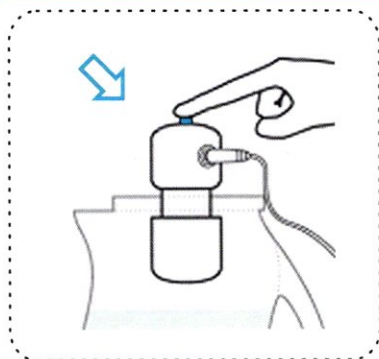

B: Put the activator host on the container.

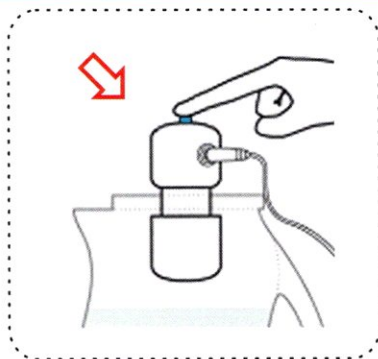

C: One end of the power adapter insert to the activator, the other end connect to power socket.

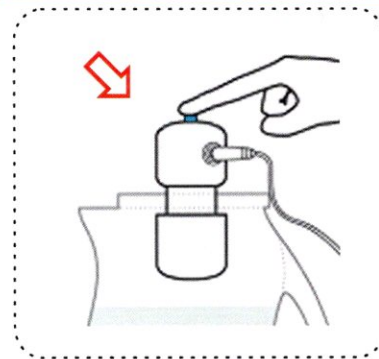

D: Press the metal switch 2sec start to work 30 mins.

Press the metal button again when finish work, the activator starts to work 30 minutes again.

Long press the metal button 3 secs in working state, the indicate light goes off entered to standby.

The device will be automatically off after works 30 mins, the edible liquid (water, milk, fruit juice, wine and other beverages) after handled can be drunk or used. Once the liquid has been activated, no need to work on it again. Once the resonance stops during work, the resonance will goes invalid.

ATTENTION

- Please hold the handle and the bottom of the bottle when use container to receive water or pour water ;
- Do not open the polymer or electronic components of the internal seal to avoid damage;
- Do not clear the polymer and do not wipe the top of the activator with a wet towel;
- The water quantity must not exceed the maximum water level, the activator head can't touch water;
- Please use ordinary temperature water or normal temperature liquids for resonance;
- Please regularly clean the container with mild detergent to avoid odor;
- Please do not repeatedly disconnect the power cord to maintain the voltage stability and the product life;
- The activated water should be kept in glass or plastic container, can't be long stored in metal container;
- Do not place water or edible liquids in metal container for resonance;
- The activator can handle all edible liquids of daily need included milk, fruit juice, wine, oil, etc.
- Water source determines water quality, preferred mineral water that can better regulate your body.

WARNING:

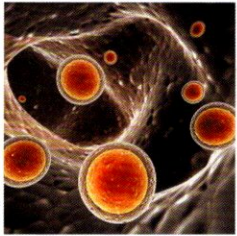

People equipped with pacemaker cannot drink the low frequency molecular resonance water.

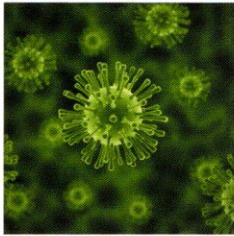

PRODUCT PERFORMACNCE

The low frequency signal in the water after resonance has a unique effect of resisting bacteria, anti-virus, anti-muscarinic and inhibiting cell mutation. The low frequency in water forms a natural inhibitory effect on unsound or unhealthy cells. This phenomenon is called destructive interference.

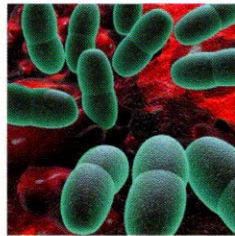

The low-frequency resonance water carries four kinds of unique frequency information, which is resonated with human healthy cells after drinking by the human body, destructive interference with unhealthy cells. Mobile phones ,signal transmitters and wireless routers, etc. which are examples of destructive interference.

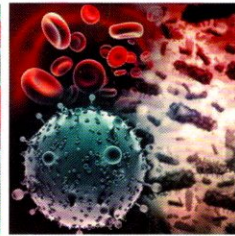

Anti-bacterial

Anti-virus

Anti-muscarinic

Cancer Prevention

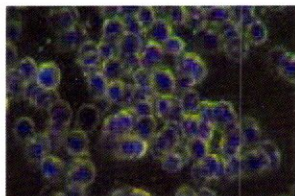

Radiation resistant

- Improve blood viscosity, reduce the incidence of cardiovascular and cerebrovascular disease;
- Closest to human cell water, enhance communication of vital cell;
- Increase the oxygen content of cells and promote strong antioxidant effects;
- Promote the health index of the intestinal flora and enhance immunity;
- Strong bactericidal action to kill bacteria and viruses in the water;
- Enhances body detoxification and inhibits harmful bacteria and viruses;
- Adjust the body PH value tends to balance;
- Best sports drinking water;
- Reduce the risk of cancer;
- Improve the mellow of wine and the sweetness of acidic juices;
- Make coffee and tea more aromatic, make rice more delicious;
- Make animals and fish more healthy, make plants and flowers more colorful;
- Compatible frequency and energy, make our food, nutrition, drugs more effective absorption in body;

PRODUCT FUNCTION

The viscosity of the low-frequency resonance water is reduced by 400 times, and it can enter the cells within 20 minutes to improve blood viscosity and increase the absorption rate by 3 times. Stimulates the function of the organism, promotes metabolism, increases cardiovascular and arterial flow, improves micro-circulation, and reduces lipid deposition.

Improve blood viscosity

Improves body's blood viscosity; reduces cardiovascular diseases; Adjust the PH balance.

More mellow and sweet

Improves the mellowness of the wine and improve the sweetness of the juice; Cooking rice will be more soft and delicious.

Anti-bacteria & Detox

Enhance body detox; Inhibition of harmful bacterial viruses; Enhance the oxygen content of cells.

Easy growth

Animals healthier, plants more flourish and the seeds germinates faster.

Improve immunity

Strong bactericidal effect; Enhance human immunity; Strong antioxidant effect.

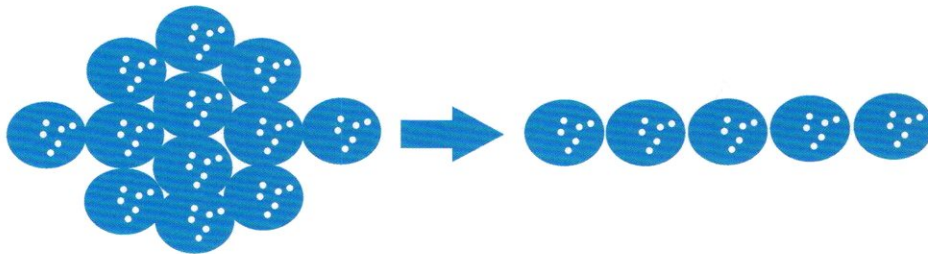

Easy absorption

Compatible frequency and energy; Nutrients and drugs absorbed more quickly.

The water channel of cell membrane in the human body only allows small water molecules and ions with a diameter of less than 2 nanometers to pass. The water molecules in the cells are arranged in a straight single molecule (the water molecule frequency is 7.8HZ) commonly known as structural water.

PRODUCT CHARACTERISTICS

The water molecules are rearranged after resonance, showing a linear structure.

Low Frequency Resonance

Live cell only resonates with the low-frequency electromagnetic waves, the range of low frequency oscillation between 0.5-15 Hz. while the range of human brain functional wave is between 0.3-30 Hz.

Energy Stability:

It can maintain water energy more than 2 years, change the structure of water molecules by using the low frequency characteristics, become a similar cell of constitution water to transmission mechanics of biological information is easier to achieve the regulation of biological metabolism activities, to maintain the constant environment of the organism for the purpose of health and self-healing.

Magnetic Information:

The process of low frequency resonance effect is set out four unique frequencies which are beneficial to human biological. In addition to removing harmful chemicals and magnetic contents in the water, turn these four unique frequencies into the water to rewrite the previously harmful magnetic messages of the water molecules.

Physical Way:

Without adding any chemicals, elements or additives, adopted a physical way to change the water structure.

High Stability:

This device remains stable working even after boiling, X-light, pressure and high radiation exposure .

Versatility:

This tech can resonate all liquids, such as fruit juice, milk, wine, coffee, tea and so on.

ABOUT WATER FREQUENCY

The size of the water molecule is detected using nuclear magnetic resonance (O-NMR) tech, which calculates the size of the water molecules by measuring the half width of the vibration frequency. The larger of the Hz value, the larger of the water molecule group, and the worse of the water quality. The smaller of the Hz value, the smaller of the water molecule group, and the better of the water quality. The following is a table for molecular group sizes of the various water samplings.

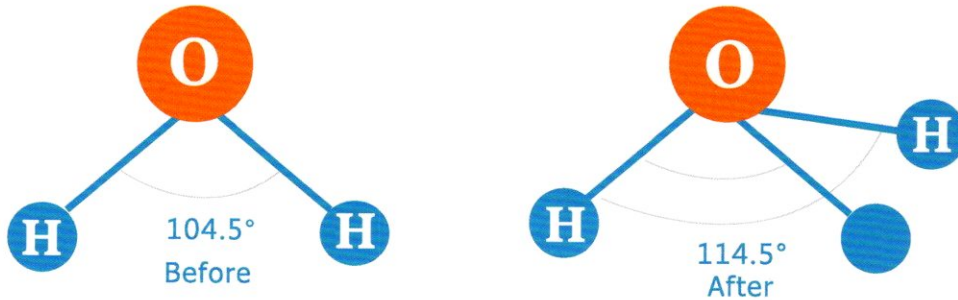

Sampling	Rainwater	Distilled water	Tap water	Well water	Mineral water
Hertz	119HZ	118HZ	117HZ	105HZ	94HZ
Sampling	Longevity village	Electrolyzed water	Tt Water	Hexagonal water	Low frequency resonance water
Hertz	80HZ	63HZ	53HZ	43HZ	7.8HZ

Scientific research has found that cell membrane has water channel which reveals the cell membrane water channel only allows small water molecules and ions with a diameter less than 2nm to pass through(a single water molecule with a maximum diameter is 0.2 NM). The small water molecule is easily enter the cell, brought nutrients to the cell tissue that can stimulate the function of the body and promote metabolism. The acidity of the human body is the source of all diseases. When more and more acidic metabolites accumulated in the body, quantitative change caused by qualitative change over a long period of time, which will lead to disease such as constipation, stomach acid, hypertension, hyperlipidemia, hyperglycemia, diabetes, gouty and uremia.

Small water molecules of Weakly alkaline plays an important role in this area. The clinical trial of 150 patients in three provincial hospitals for 2-4 months showed that there were significant effects on cardiac arteriosclerosis, atherosclerosis, hyperlipidemia and hypertension. The patients can significantly feel chest tightness, heartache, palpitations, premature beats, leg soft, shortness of breath, headache, dizziness, insomnia, limbs, cold, limb numbness, blurred vision and other symptoms caused by above pathogen have been alleviated. The water molecules can also increase the flow of cardio cerebral arterial, improve the heart and brain electrogram and micro-circulation, reduce blood viscosity, blood glucose and blood uric acid, increase blood levels of high-density lipoprotein and gradually reduce lipid deposition in arteries.

Water molecules not only can moisturize cells, but also can activate cells. Accelerated metabolism, timely discharged waste in the body which is closely related to our health.

WORKING PRINCIPLE

The theoretical basis of molecular resonant water

The water molecule H₂O is a polar covalent bond between two hydrogen atoms and one oxygen atom, and the angle between the covalent bonds is 104.5 degrees. The structure can be changed according to following conditions:

- High temperature
- High pressure (groundwater level)
- Specific natural magnetic field N times

Changing the molecular structure with high proton energy does not need to add any matter in water, so that can change the nature of the water molecular structure. When the radiation of magnetic field controls the electron distribution structure in the molecule and atom, using copy mode to push the electronic wave to the remote distance under control.

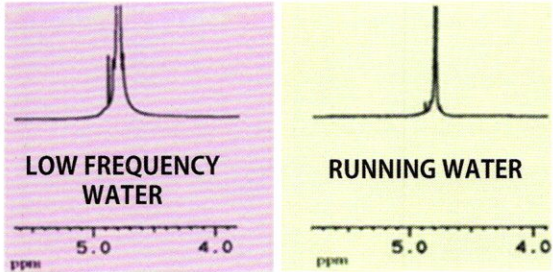

The water changed after low frequency resonance

The water activated through the low frequency of resonator for 30 minutes, will change and reorganize the water molecular structure, and become a small water molecules like body fluids to facilitate the cell absorbed quickly within 20 minutes (the general water may take several times or even more times).

The water molecules after low frequency resonance significantly widened about 10 degrees to become a stronger hydrogen bond due to hydrogen bond angle, which will increase the water energy and easier to neutralize free radicals (such as H⁺, OH⁻, Ca²⁺, Mg²⁺), It can balance the body pH Value.

The molecular resonance effect tech converts four different kinds of healthy diets into the water, rewriting the previously harmful magnetic info of water molecules. These healthy info can be left in the water at least two years at room temperature, but not directly exposed to sunlight time.

NUCLEAR MAGNETIC TEST

NMR Peak Width of 2.5 times

Laboratory equipment: 500 MHz

Bruker AM-500 spectrometer

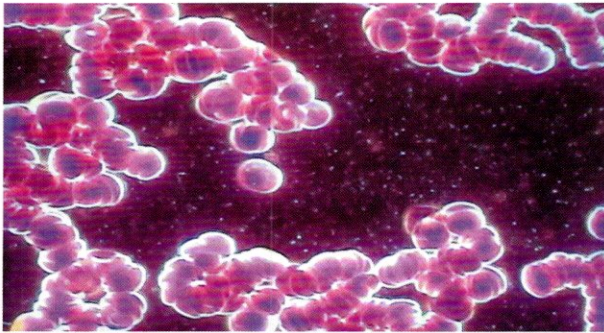

This test shows that the photon peak value of low frequency Resonance water is 2.5 times higher than the running water.

NMR Frequency is 7.8Hz

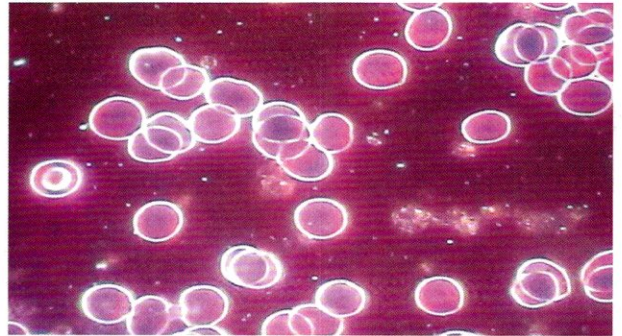

The Chinese Academy of Sciences tested the water frequency is 7.8Hz after activated by the molecular resonance equipment.

The only way to detect the size of water molecules is nuclear magnetic resonance(O-NMR) tech, which calculates the size of the water molecules by measure the half width of the vibration frequency. The larger the value, the larger the water molecule, the smaller the value, the smaller the water molecule.

A DROP OF BLOOD TEST

Before

After

According to this test results:

After drink low frequency resonance water 20 minutes later, blood viscosity improved significantly. The test proved that the water can quickly enter to the human cells and add energy to the cells.

VERIFICATION EXPERIMENTS

Coliform experiment: the total number of coliform in the molecular resonance water decreased by 86%. This test proved that the effect of disinfection and sterilization generated in molecular resonance.

The sensitivity test of tumor cell: tumor cells were immersed 24 hours in the molecular resonance water, the concentration of 1:10. Compared with control group, the water can inhibit the growth of tumor cells, human cancer cells and dog cancer cells up to 0.99 in the statistical validity.

White blood cell experiment: this experiment is aimed at patients who receiving chemotherapy. In the early stages of chemotherapy, the usage of the molecular resonance water can prevent the total number of white blood cells dropped to the lowest level, and cause a rebound effect - can be restored to the initial level of chemotherapy in 2-3 days (generally takes 6-7 weeks) the experimental results in the statistical validity of 0.95.

Message transfer experiment: a photographs were taken from a microscope with 4000 big multiples of white spot of a black contrast. It shows the micro-molecular force structure of the general water changed, and the images of the molecular resonance water shows its more structured and contains more vivid biophoton radiation, this experiment proves that the molecular structure of the water is more rigorous and the message transfer is more fast than the general water.

Resistance coefficient experiment: the resistance coefficient is used to measure how much water can withstand the current. The resistance coefficient of healthy water should be 6000 (molecular resonance water is 6334) which means that the water can withstand a fairly high current. When the water's resistance coefficient dropped, our kidneys have to spend more time to deal water with pollutants and other chemicals. So the water has shown that the resistance coefficient mostly close to the ideal value.

Milk test: this test confirmed that the milk after resonates can inhibit the growth of bacteria and mold. The milk will be converted into a natural fermentation process similar to the cheese stage.

Plant growth experiment: the molecular resonance water can strengthen cell growth rate, irrigated onions with molecular resonance water shows their root grew faster due to the high absorption capacity of the water, and its molecular structure with high energy has changed. On the sixteenth day, the root bud of the onion was fed with the activated water up to 5 inches, while the general irrigation of onion is no germinated.

Redox experiment: this test using a technique that injects nitrogen into two water samples allowed water to be frozen immediately. Cross-polarizer and photographic camera takes two crystalline samples of water. These experiments were conducted at Meixa Technology Lab in Cardiff, California, USA. The crystal structure of general water is widely present rupture and chaotic crystal arrangement, that is because more impurities contained and the molecular structure is loosed causes disturbed in the crystallization process. The structure of molecules in the water are neatly arranged more likely in the same direction of crystallization, so the low frequency resonance water produce a typical hexagonal crystal structure in the ice state.

The experiment of corona discharge effect: the conductive sample water around the corona cold electron emission of the physical process will produce corona discharge effect. As a result, the electrons of the molecular resonance water is more intense that is only occurs when the structure changes in the molecular water.

Introduction to Bio-Physics of Activated Water

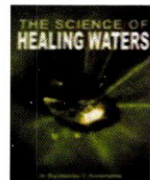

Write by Professor V.Vysotskii,Dr.I.Smirnov and Dr.A.Kornilcva

V.Vysotskii and A.Kornilova are a world famous nuclear physicists.

University Research Book Published by Xingren Hua Wrote by He Yi

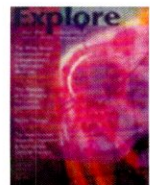

《Holistic Medicine》 in the twelfth chapter,officially listed in the curriculum.

The Science of Healing Water

This book wrote by D r . Sundardas

The author explains the techniques and benefits of molecular resonance in detail in this book.

The activated Water

Published in 2002 of U.S.A Explore Science and Technology Publications, wrote by Dr.Igor Smirnov This publication is especially for medical professionals, scientists and other researchers to provide the latest scientific and tech information.

QUESTION & ANSWER

What is the difference between low frequency molecular resonance water and water purifier?

These are two different work principle, water purifier is specifically designed for water clean, but the low frequency resonance water activator change structure of molecules for all edible liquid without touch the liquid.

Can I drink low frequency resonance water in every day? What contraindication is there?

Yes, we recommend drinking the water every day. For severe patients and elders just begin with a limit drinking. Recommended from 500ML-600ML per day, add the drinking amount slowly .

Does the low frequency resonance water contained minerals?

No, the water source determines the minerals contained or not and how many types of mineral contained. The device will not increase or decrease the mineral in the water.

Does the low frequency resonator water change the PH value of the water?

Yes, but PH value is not the main factor determines the efficacy

Can you freeze or heat low frequency resonant water?

Yes, can not be stored in a metal container for a long time.

Can you wash fruits and vegetables with low frequency resonance water?

YES, put the fruit or vegetables in low frequency water for 5 minutes, harmful bacterias significantly reduced.

What is the working requirement for the environment?

Do not try to work near metal objects while working, do not close to the high electromagnetic radiation products.
(such as microwave ovens, induction cooker, etc.)

What is the working requirement of the container?

Can not stored in metal containers for a long time, the arrangement structure of water molecules will be disturbed.

Iron container can be used to contain the the low frequency molecular water?

Do not use iron containers store the low frequency water for a long time, but you can use it for heating a while. We are recommend using low-frequency resonance water with glass or high-quality plastic containers.

QUESTION & ANSWER

What is blood viscosity? What is the harm? Can low frequency resonance water improve blood viscosity?

Blood viscosity is not an independent disease, but there are many clinical diseases such as arteriosclerosis, cerebral thrombosis, myocardial infarction, hypertension, diabetes, obstructive retinitis, chronic liver and kidney disease which are closely related with blood viscosity. That is because the organic tissue obtain oxygen and nutrients are relatively decrease when people's blood viscosity increased and the blood flows slow down. Particularly, the excessive red blood cell aging and hardening causes the occurrence of red blood cell aggregated, increases blood thick and blood clots resulting in vascular embolization and ischemic cardiovascular diseases. The viscosity of the low frequency water is 400 times lower than the ordinary water that changes the structure of water molecules into cells direct drinking water, the absorption rate of the cells increased by 3 times, effectively increase the water content and the efficiency of communication between the cells. Significantly improve the blood circulation system and enhance its efficiency. Water entered to the cells improve blood viscosity in 20 mins which greatly reduce the risk of cardiovascular disease.

How to drink low frequency resonance water in patients who has cardiovascular disease?

The most of coronary heart disease is caused by obstruction of normal blood flow in the accumulation of fat in the coronary artery. The important function of the low frequency water is decompose and eliminate the fat, but patients taking cardiac should stop drinking the water and patients with cardiac pacemaker disabled. The majority of patients with high blood pressure is acidic, the most obvious cause is excessive intake of fat and the vascular wall is easy to add cholesterol and the vascular cross-sectional area narrowed. The low frequency water easy to break down cholesterol due to its strong dissolving ability. As long as regular drinking can effectively neutralize the acidic substances in the blood, the blood pressure drops down can avoid hardening and rupturing of the blood vessels. Coronary heart disease ,hypertensive patients should begin to drink a small amount of active water in (800ML), and gradually increased the intensity to 8%-10% of daily drinking amount. People with hypertension should be drunk fasting or before meal in 1 hour.

The general reaction: coronary heart disease in the initial reaction of shortness and not smooth breath and emotional instability that need continue to take drugs. Hypertensive patients may be temporarily elevated blood, the head has a heavy and dizzy feeling will gradually improved. Can be combined with hypertensive drugs will gradually reduce as situation.

Why does the low frequency resonance water improve kidney disease?

The human body has edema phenomenon must limit drinking water, while the low frequency water not only has a very good diuretic effect, but also clean the health of edema and promote the body's metabolism has a particularly significant effect.

Why does the low frequency water improve constipation?

The low frequency molecular water can neutralize a variety of acidic toxins and increase the oxygen, dissolving force is strong and easy to break down the excretion, prevention of acid corrosion produced. Morning Drinking 2-3 cups of cold active water can promote intestinal movement and eliminate constipation.

Does the low frequency molecular water have a disease prevention function?

If human body is full of low frequency molecular water which can neutralize free radicals, prevent many modern diseases, cancer and delay aging. Drinking the low frequency water that is an effective health care and a beneficial way of longevity in a long term .

PRODUCT MAINTENANCE SERVICE

WARRANTY TERMS

1. This product strictly abide by our national warranty policy to provide service;
2. The whole machine warranty for one year, the main parts of the warranty for one year;
3. Non-family use (such as: business, commercial, corporate collectives), the whole machine and the main parts of the warranty for six months.

PRODUCT WARRANTY

1. Effective shopping invoice and warranty card shall be issued during maintenance. The warranty is valid on the date of invoice. Otherwise, according to the production date of manufacturer;
2. After repaired by a special maintenance network in 30 days, the same site and the same fault occurred again shall be free repaired by this maintenance network again;
3. The damaged parts owned by the maintenance network during the warranty period, the parts are not replaced during the warranty period are owned by the user;

THE FOLLOWING CONDITIONS ARE NOT COVERED BY THE WARRANTY

1. Damaged by user's improper handling, use, maintenance or storage, damaged at voltages below 187 volts or above 240 volts;
2. Not in accordance with the product manual to install, maintain, use caused damage;
3. Not our company's professional service personnel to dismantle, repair and damage the product. Damage caused by force majeure;
4. If the product exceeds the warranty period, or the model or number of the invoice are not in conformity with the product physical object.

MAINTENANCE FEE

1. Free warranty service is provided within the warranty period and the warranty range without any fee;
2. Not in the range of product warranty or beyond the warranty period, will charge corresponding fees according to the actual situation of damaged parts;
3. Product is limited to household use, we are not responsible for any problem arise in non-household use;

If you have any operational difficulties or machine fault during usage, please contact with our distributors or contact us directly.

WARRANTY CARD

Thank you very much for choose our product.

Customer first is our service principle. Your kindly advise will be highly appreciated.

This card will be for you to enjoy our product warranty service. Please fill this card and send it to us with the product which conform with warranty conditions. Our product has been tested by professional organization that meet the quality requirements of factory granted.
